-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Applicant's election without traverse of Group I, Species I (Figures 1-3, claims 1-2 and 15-16) in the reply filed on 10/20/2004 is acknowledged. Non-elected claims 3-14 and 17-28 are withdrawn from consideration.

Drawings

2. Figures 12-13 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Singer et al (US 5,773,796. Singer discloses a heated roller assembly (10) comprising a heat transfer medium flowing path (31) therein and heats a member to be processed

abutting against a surface (13) of the roller (10) or absorbs heat therefrom by heat transfer fluid (34) flowing through the heat transfer medium flowing path (31), wherein a sealed chamber (32, 33) extending in a longitudinal direction of the roller (10) and in which heat transfer medium of vapor-liquid two phases is sealed is formed within a thick portion of the roller (col. 4, lines 9-30).

5. Claims 1-2 are rejected under 35 U.S.C. 102(a) as being anticipated by Hirst et al (US 6,580,895). Hirst discloses a fusing system comprising a heat transfer medium flowing path (306) therein and heats a member to be processed abutting against a surface (212) of the roller (136) or absorbs heat therefrom by heat transfer fluid (col. 6, lines 60-66) flowing through the heat transfer medium flowing path (306), wherein a sealed chamber (col., lines 4-13) extending in a longitudinal direction of the roller (136) and in which heat transfer medium of vapor-liquid two phases is sealed is formed within a thick portion of the roller (col. 7, lines 14-28).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Singer et al (US 5,773,796 in view of Hirst et al (US 6,580,895). Singer discloses substantially all features of the claimed invention except an electromagnetic induction heating mechanism. Hirst discloses an electromagnetic induction heating mechanism

(co. 5, lines 65). It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize in Singer an electromagnetic induction heating mechanism as taught by Hirst in order to provide heat faster and more effective.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Foote et al (US 6,339,211) discloses a temperature differential over a length of a fuser.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang T Van whose telephone number is 703-306-9162. The examiner can normally be reached on 8:00Am 7:00Pm M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on 703-305-5766. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
